

## Laboratory Technician for HPLC

MLM has grown steadily in recent years and we're still growing. We offer an interesting variety of tasks in a modern laboratory setting alongside a dedicated team (currently over 70 employees).

Would you like to join our team in Mönchengladbach, near Düsseldorf?

We are seeking a full-time **laboratory technician** (M/F) to perform laboratory analyses of serum, plasma and urine via HPLC.

### Your responsibilities:

- Measurement of mainly endogenous substances like catecholamines, amino acids or metabolites with commercial or de novo developed assays
- Depending on skills and workload additional application of techniques including clinical chemistry, ELISA, RIA and flow cytometry

### Your qualifications:

- Biological or chemical technical assistant (BTA/CTA), chemical engineer, biotechnologist, chemist with two year experience in instrument based analytics, especially HPLC
- Good level of computer literacy
- High sense of responsibility, flexibility and team spirit
- Fluent in German and a good level of English is welcome
- GCP and GLP knowledge is a plus but can also be acquired at MLM

For those who speak German as their first language please send your application in German.

We are looking forward to your application!
