

Life Scientist as Method Development and Validation Specialist

MLM has grown steadily in recent years and we're still growing. We offer an interesting variety of tasks in a modern laboratory setting alongside a dedicated team. Highly skilled with extensive clinical lab experience, our team of more than 70 employees supports between 130 and 140 clinical studies at any given time.

Would you like to join our team in Mönchengladbach, near Düsseldorf?

We are looking for a biologist or chemist as a full-time **Method Validation Specialist** (M/F) to accompany analytical method validation studies in our lab.

Your responsibilities:

- Design of validation plans compliant with the EMA and FDA Guidelines for Bioanalytical Method Validation, GLP and our SOPs
- Set-up and supervision of the laboratory work on validation studies on various analytical platforms (Tecan Sunrise, MSD Quickplex, Cobas, KRYPTOR, ACL Top, Waters HPLC etc.)
- Evaluation of experimental results and assessment of validation parameters like precision, accuracy, LLOQ, stability and robustness
- Summary of data in QA-reviewed validation reports
- Maintenance and regular updates of MLM's parameter data base

Your qualifications:

- Master/doctoral degree or equivalent in life sciences (e.g. Biology, Biochemistry, Biotechnology, Chemistry, Analytical Chemistry, Food Chemistry, Pharmacology, Medical Sciences)
- Hands-on experience with method validation experiments is required
- Knowledge of bioanalytical method validation guidelines and regulatory requirements of FDA and EMA is of advantage
- Experience in pharmaceutical or biotech research and development in an industrial setting or foreign experience is a plus, but not required
- Excellent communication and organizational skills
- Great interest in laboratory medicine is required
- Pro-active and self-motivated personality and very meticulous, able to work independently, strong team player
- Fluent in German and English

For those who speak German as their first language please send your application in German.

We are looking forward to your application!

About MLM:

MLM Medical Labs is a Central Laboratory dedicated exclusively to clinical trials. We offer full laboratory services, including a whole range of analytics: standard safety profiles, such as blood counts, coagulation, urinalysis and clinical chemistry, and analyses of biomarkers, drug compounds, metabolites and molecular diagnostic parameters.

Internationally active in over 40 countries, including the U.S. and Eastern Europe, we're located in Mönchengladbach, near Düsseldorf.

Highly skilled with extensive clinical lab experience, our team of more than 70 employees supports between 130 and 140 clinical studies at any given time.

We have run trials on a broad range of indications, including diabetes, cancer, infectious diseases, dermatology, and diseases affecting the cardiovascular, neurological and immunological systems.

All members of the technical staff are certified scientific or medical assistants. Half of the team have degrees in chemistry, biochemistry, biology or physiology and a quarter have completed PhDs in relevant fields.

We serve renowned CROs and companies in the biotech and pharmaceutical industries in Europe, Asia and the U.S. To fully support this worldwide client base, we've developed an outstanding level of flexibility and dedicated ourselves to high-quality results delivered promptly.
