

LPS Lung Injury 24 and 72 hours

Description of histology scoring parameters and individual data:

Study description: Lung inflammation induced by oral aspiration of LPS. Post euthanasia, lungs were inflated and fixed with formalin 10% for histological analysis.

Slides: lung sections, H&E staining

Scoring Parameters: Score of leukocyte infiltration is semiquantitative.

WNR: within normal ranges;
 0: no infiltrate
 1: minimal infiltrate
 2: mild infiltrate
 3: moderate infiltrate
 4: marked infiltrate

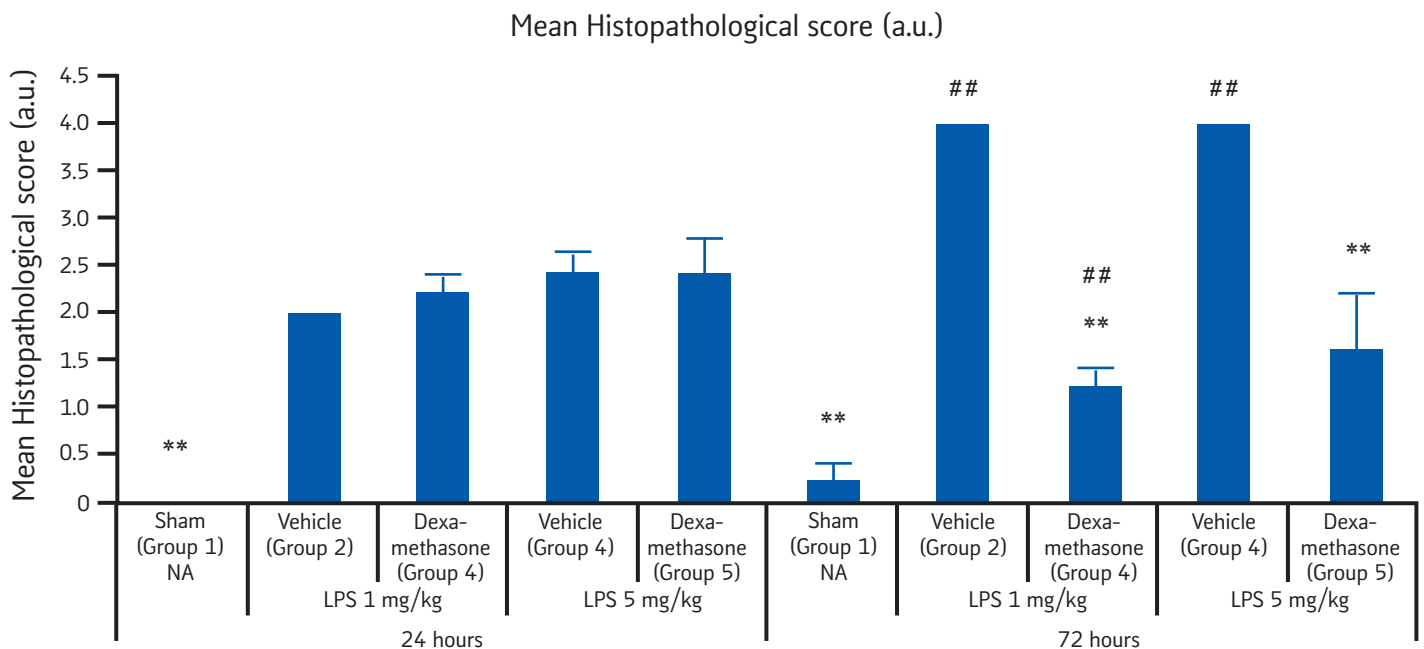

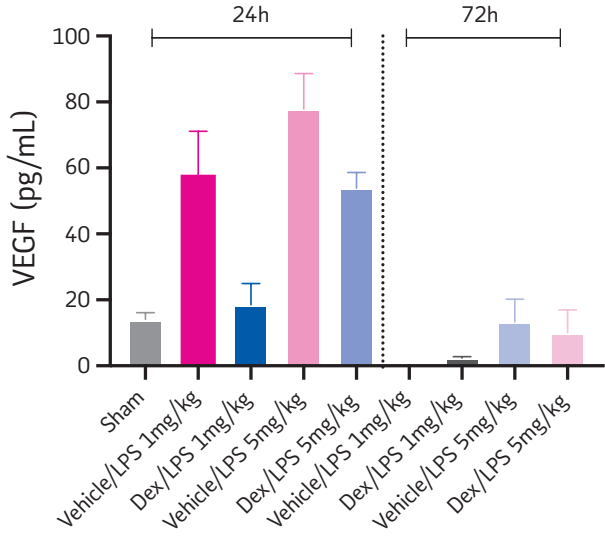

Figure 1: Mean Histopathological Score in arbitrary units (a.u)

** p<0.01 using Student's T-test vs. Vehicle of corresponding time point and LPS dose

p<0.01 using Student's T-test vs. corresponding group on 24h

Biomarker Level in BALF

Total Protein Level in BALF

Our Clients Say ...

"The performance of your team far exceeded our expectations. The study was performed well and we appreciate all your input into the study design. Your responsiveness and feedback during the study and following in the data interpretation was extremely helpful to guide our next steps. That's something we don't find with every CRO."

S.G., Toxicologist, Biotech Company

"Of all the CROs that I have used over the years... MLM Medical Labs been one of the very best in terms of scientific knowledge, data quality, timelines, flexibility and personal contacts."

O.B., Director of Therapeutics, Pharmaceutical Company

"Throughout our relationship, you have been attentive to our needs and have completed exploratory pilot studies and three drug studies with professionalism and an understanding of tight biotech timelines that are unmatched by other CROs."

D.Z., Director of Therapeutics, Biotech Company

About MLM Medical Labs

MLM Medical Labs is a leading specialty and central laboratory with comprehensive research services and analytical capabilities in Europe and the United States. Offering standard and fully customizable biological specimen testing and auxiliary logistics services across a wide spectrum of therapeutic areas, we add value at every stage of the product development process, from nonclinical and preclinical through phase IV clinical trials that serve to augment and accelerate research programs to their next stages and milestones. Each disease area is supplemented extensively by different models and batteries of *in vitro* and *ex vivo* analyses, offering answers to your therapeutics' effect on different parameters. With our strong reputation for scientific expertise, passionate approach to customer care, and adherence to quality data, we empower clients ranging from emerging biotech to Top Ten Global Pharma companies to reach confident clinical decisions that ultimately serve to improve patient lives.
